

Software for Developing Nutrient Management Plans Workshop

Three workshops offered in 2018:

- 1/17-OSUE Fulton County, 8770 St Rt 108, Wauseon OH
- 2/7-OSUE-Putnam County, 1206 E Second St, Ottawa, OH
- 3/14-OSUE Madison County, 217 Elm St, London, OH

All workshop Start at 9:30 am and End by 3:45 pm

Registration one week prior to workshop at
<http://go.osu.edu/nmpworkshop>

What is the Workshop About?

Workshop will demonstrate:

1. MapWindow GIS with MMP Tools
2. MMP
3. NRCS Ohio Nutrient Management Templates used for programs such as EQUIP.

The training will use a sample farm to demonstrate the utilization of these two programs to generate a plan that can be presented to NRCS for approval.

Program description and download location.

- **MapWindow GIS** is an open source GIS product that is used to develop nutrient management plans by defining fields and farms then downloading spatial data such as soil types which provide base information needed for MMP is Nutrient Plan development. Data generated is exported to MMP through the MMP tools function. The version used for the workshop is dated 7/28/2015 on the website at <http://www.purdue.edu/agsoftware/mmp/>
- **MMP Version 0.38** (20-Oct-2017) current release of the program from Purdue and is linked for download through <http://www.agry.purdue.edu/mmp/> .

- The current **NRCS Word templates for Ohio plans** have been developed by NRCS State Agronomist Eric Schwab are a part of file for this workshop or can be found in the Electronic Field Office Technical Guide (eFTOG) at <https://efotg.sc.egov.usda.gov/> then on graphic click on Ohio>'County Name">Section I> Folder "Software and Plan Formats"

Session Resourced by:

Greg LaBarge
Field Specialist, Agronomic Systems
Ohio State University Extension
