*Email address is optional and if you would like to receive an update on the species identification from your submitted sample.

Sample Information:

GPS Coordinates of field: _____

Soybean variety (if known): _____

Soil type (if known): _____ Previous crop: _____

Soybean seed treatments (if applicable): _____

Date symptoms first appeared: _____ Percent of field affected: _____

Would you like to receive an update on the species identification of your submitted sample? (please circle one)

YES

NO

Please send samples to:

OSU Soybean Pathology & Nematology c/o Jenna Moore
Kottman Hall, Room 110
2021 Coffey Rd,
Columbus, OH 43210

Sample Submission: Please submit entire soybean plants. Since SDS is a root-borne pathogen, it is extremely important to include the roots. A fresh sample is always best. We suggest packaging the plant sample in an airtight Ziplock bag prior to mailing, as it helps to retain moisture and freshness. Please attempt to reduce the time sample is exposed to extremely hot temperatures. Please complete the attached submission form if possible.

THANK YOU for your participation & interest in OSU Soybean Pathology!
